

WHAT OTHER ENVIRONMENTAL AND ENERGY
"INSIDERS" SAY ABOUT DAVE FREEMAN AND
WINNING OUR ENERGY INDEPENDENCE:

"I HAVE KNOWN AND ADMIRER DAVE FREEMAN'S THIRTY YEARS OF CLEAN ENERGY PIONEERING. THIS BOOK REFLECTS HIS PRACTICAL EXPERIENCE AND REVEALS THAT IT IS POSSIBLE AND PROFITABLE THAT AMERICA PHASES OUT COAL, OIL AND NUCLEAR AND CONVERTS TO RENEWABLE FORMS OF ENERGY AS WELL AS A SAFE, SECURE AND VITAL FUTURE."

—ROBERT REDFORD, 2007

"DAVE FREEMAN IS A REAL VISIONARY AND LEADER WHEN IT COMES TO ADDRESSING AMERICA'S ENERGY AND ENVIRONMENTAL PROBLEMS. HE'S AN ENVIRONMENTAL ZEALOT, AND THE WORLD NEEDS MORE DAVE FREEMANS."

—T. BOONE PICKENS, FEBRUARY 2007

S. DAVID FREEMAN has had the ear of federal officials since the days of JFK. He helped bring about the Environmental Protection Agency (EPA) under Nixon. He headed the Tennessee Valley Authority, the nation's largest nuclear program, under Jimmy Carter. From New York to Los Angeles, Freeman has headed agencies and utilities companies, continually working to make utilities more environmentally safe, more efficient, and more cost-friendly to the customer. He authored *Energy: The New Era*. He has three children and nine grandchildren. He is currently president of the commission overseeing the Port of Los Angeles and lives in neighboring Marina del Rey.

WINNING OUR ENERGY INDEPENDENCE

{AN ENERGY INSIDER *** SHOWS HOW}

WINNING OUR ENERGY INDEPENDENCE

WAR. TERRORISM. GLOBAL WARMING.
LEAKING NUCLEAR WASTE DUMPS.
HIGH OIL PRICES.

We are facing an international energy crisis of unprecedented proportion. The foreign policy of the United States is uncomfortably associated with our dependency on foreign oil. Carbon-based fuels are creating a greenhouse effect that is wreaking havoc around the world. Nuclear power is not only dangerous, but it is also not an economically feasible solution. The earth needs an answer and it needs one fast.

The answer for the energy crisis is in renewable resources. Solar and wind power, ethanol and other biofuels, geothermal energy, hydrogen, and other renewable resources will preserve life as we know it. The United States—indeed, every country in the world—needs to be able to produce, use, and store its own energy. There is no time to delay. The technology exists today to make substantial changes in our energy production and use.

Long-time energy insider S. David Freeman challenges the United States and the world to create a high-energy global civilization where each nation has its own homegrown, carbon-free renewable source of energy. It is not a hope or a dream. Freeman explains how the combined action and voice of ordinary people can make a difference and can save the world from destruction.

Freeman has an answer to winning the energy war, and everyone should listen.
