GREG MURRAY

INTRODUCTION

IN EARLY 2014, I began taking photos of Bailey, our rescued cane corso, eating peanut butter. I wanted to capture more animated photos of her because her droopy jowls sometimes made her appear a little sad. More than a year later, I began photographing dogs in my studio eating peanut butter. I thought a photo series would be fun and keep me busy during my slow season in January and February. I posted a gallery of the photos online and, just like that, it went viral: selected photos were featured online and in newspapers around the world. Long story short, I signed a book deal and my first book, *Peanut Butter Dogs*, was released in 2017.

Nothing made me happier than to know people around the world were smiling and laughing because of my photos of dogs enjoying peanut butter. The ability to create something that brings joy to others is an unbelievably good feeling. While I thought I was set on only doing one book about dogs eating peanut butter, I was also eager to bring more joy, smiles, and laughter to the world. Three years later, in 2020, it only seemed fitting to make another peanut butter book.
